

HP OpenVMS Enterprise Directory Version 5.6

Read Before Installing

HP OpenVMS Enterprise Directory Version 5.6 is an upgrade of HP OpenVMS Enterprise Directory Version 5.5 ECO1.

Read the Release Notes and Installation Guide before installing HP OpenVMS Enterprise Directory Version 5.6.

Prerequisite Software

Before you install the HP OpenVMS Enterprise Directory Version 5.6 ensure that you have the following installed and working on your system:

- OpenVMS Alpha V7.3-2 or later
- or
- OpenVMS I64 V8.2 or later

For the HP OpenVMS Enterprise Directory Version 5.6 on OpenVMS Alpha V7.3-2 or later (excluding Topaz Alpha), the following optional softwares can be installed on your system:

1. For LDAP or X.500 protocols that use RFC1006 connections, HP TCP/IP Services V5.4 ECO5 or later for OpenVMS Alpha.
2. For X.500 protocols over an OSI network, DECnet-Plus for OpenVMS Alpha V7.3-2 or later including the application option (OSAK).

Note: At least one of the above-mentioned optional softwares need to be installed for HP OpenVMS Enterprise Directory to work.

3. For LDAPv3 over SSL, HP SSL V1.1 or later for OpenVMS Alpha.

For the HP OpenVMS Enterprise Directory Version 5.6 on OpenVMS Alpha V8.2 or later, the following optional softwares can be installed on your system:

1. For LDAP or X.500 protocols that use RFC1006 connections, HP TCP/IP Services V5.5 or later for OpenVMS.
2. For X.500 protocols over an OSI network, DECnet-Plus for OpenVMS Alpha V8.2 or later including the application option (OSAK).

Note: At least one of the above-mentioned optional softwares need to be installed for HP OpenVMS Enterprise Directory to work.

3. For LDAPv3 over SSL, HP SSL V1.1 or later for OpenVMS.

For the HP OpenVMS Enterprise Directory Version 5.6 on OpenVMS I64 V8.2 or later, the following optional softwares can be installed on your system:

1. HP TCP/IP Services V5.5 or later for OpenVMS Integrity servers.
2. For X.500 protocols over an OSI network, DECnet-Plus V8.2 or later for OpenVMS Integrity servers including the application option (OSAK).

Note: At least one of the above-mentioned optional softwares need to be installed for HP OpenVMS Enterprise Directory to work.

3. For LDAPv3 over SSL, HP SSL V1.1 or later for OpenVMS Integrity servers.

New Features in this Release

Following are the new features in this release:

- Password Policy

HP Enterprise Directory Version 5.6 implements the password policy as defined in Draft Behera. The policy provides the ability to ensure the secure read and update access to directory information throughout the network. The policy is applied on a password that is used to authenticate. The policy also includes the following:

- Whether and when passwords expire
- Whether failed bind attempts cause the account to be locked and
- If and how users are able to change their passwords.

The password policy can be applied to any attribute holding a users password used for an authenticated LDAP bind operation. Here the term user represents any LDAP client application that has an identity in the directory.

For details on usage and applicability of password policy as defined in Draft Behera, see Section 11 in the HP OpenVMS Enterprise Directory Release Notes.

- Password Hashing

HP Enterprise Directory Version 5.6 implements hashing of the users password. Here the term user represents any LDAP client application that has an identity in the directory. The directory server provides options of crypt and the algorithms supported by `OpenSSL_add_all_digests()` function of OpenSSL library with which the users password can be hashed.

For details on usage and applicability of password hashing, see Section 12 in the HP OpenVMS Enterprise Directory Release Notes.

- Configuring HP Enterprise Directory for Failover Capability on OpenVMS Cluster

Sample steps and procedures that allow automatic failover of the DSA in a VMS cluster environment have been added to section 13 in the HP OpenVMS Enterprise Directory Release Notes.

- Enabling Memory Tracing Facility

Memory tracing facility is added to this version of DSA, which can be turned on as required for faster diagnostics of DSA. For details on enabling memory tracing facility, see Section 14 in the HP OpenVMS Enterprise Directory Release Notes.

- Support for Samba Schema 3.0

Samba 3.0 Schema elements are supported in this version of HP Enterprise Directory. For details on Samba 3.0 schema elements, see Section 15 in the HP OpenVMS Enterprise Directory Release Notes.

Configuration Tutorials

Chapter 2 and Chapter 3 of *HP Enterprise Directory — Management* provide configuration tutorials. If you are installing HP Directory products for the first time, you might find the tutorials a useful introduction to managing the product.
